

Fluxion

Third-pillar pension plans
that fit real life.

Fixed payments stay the same

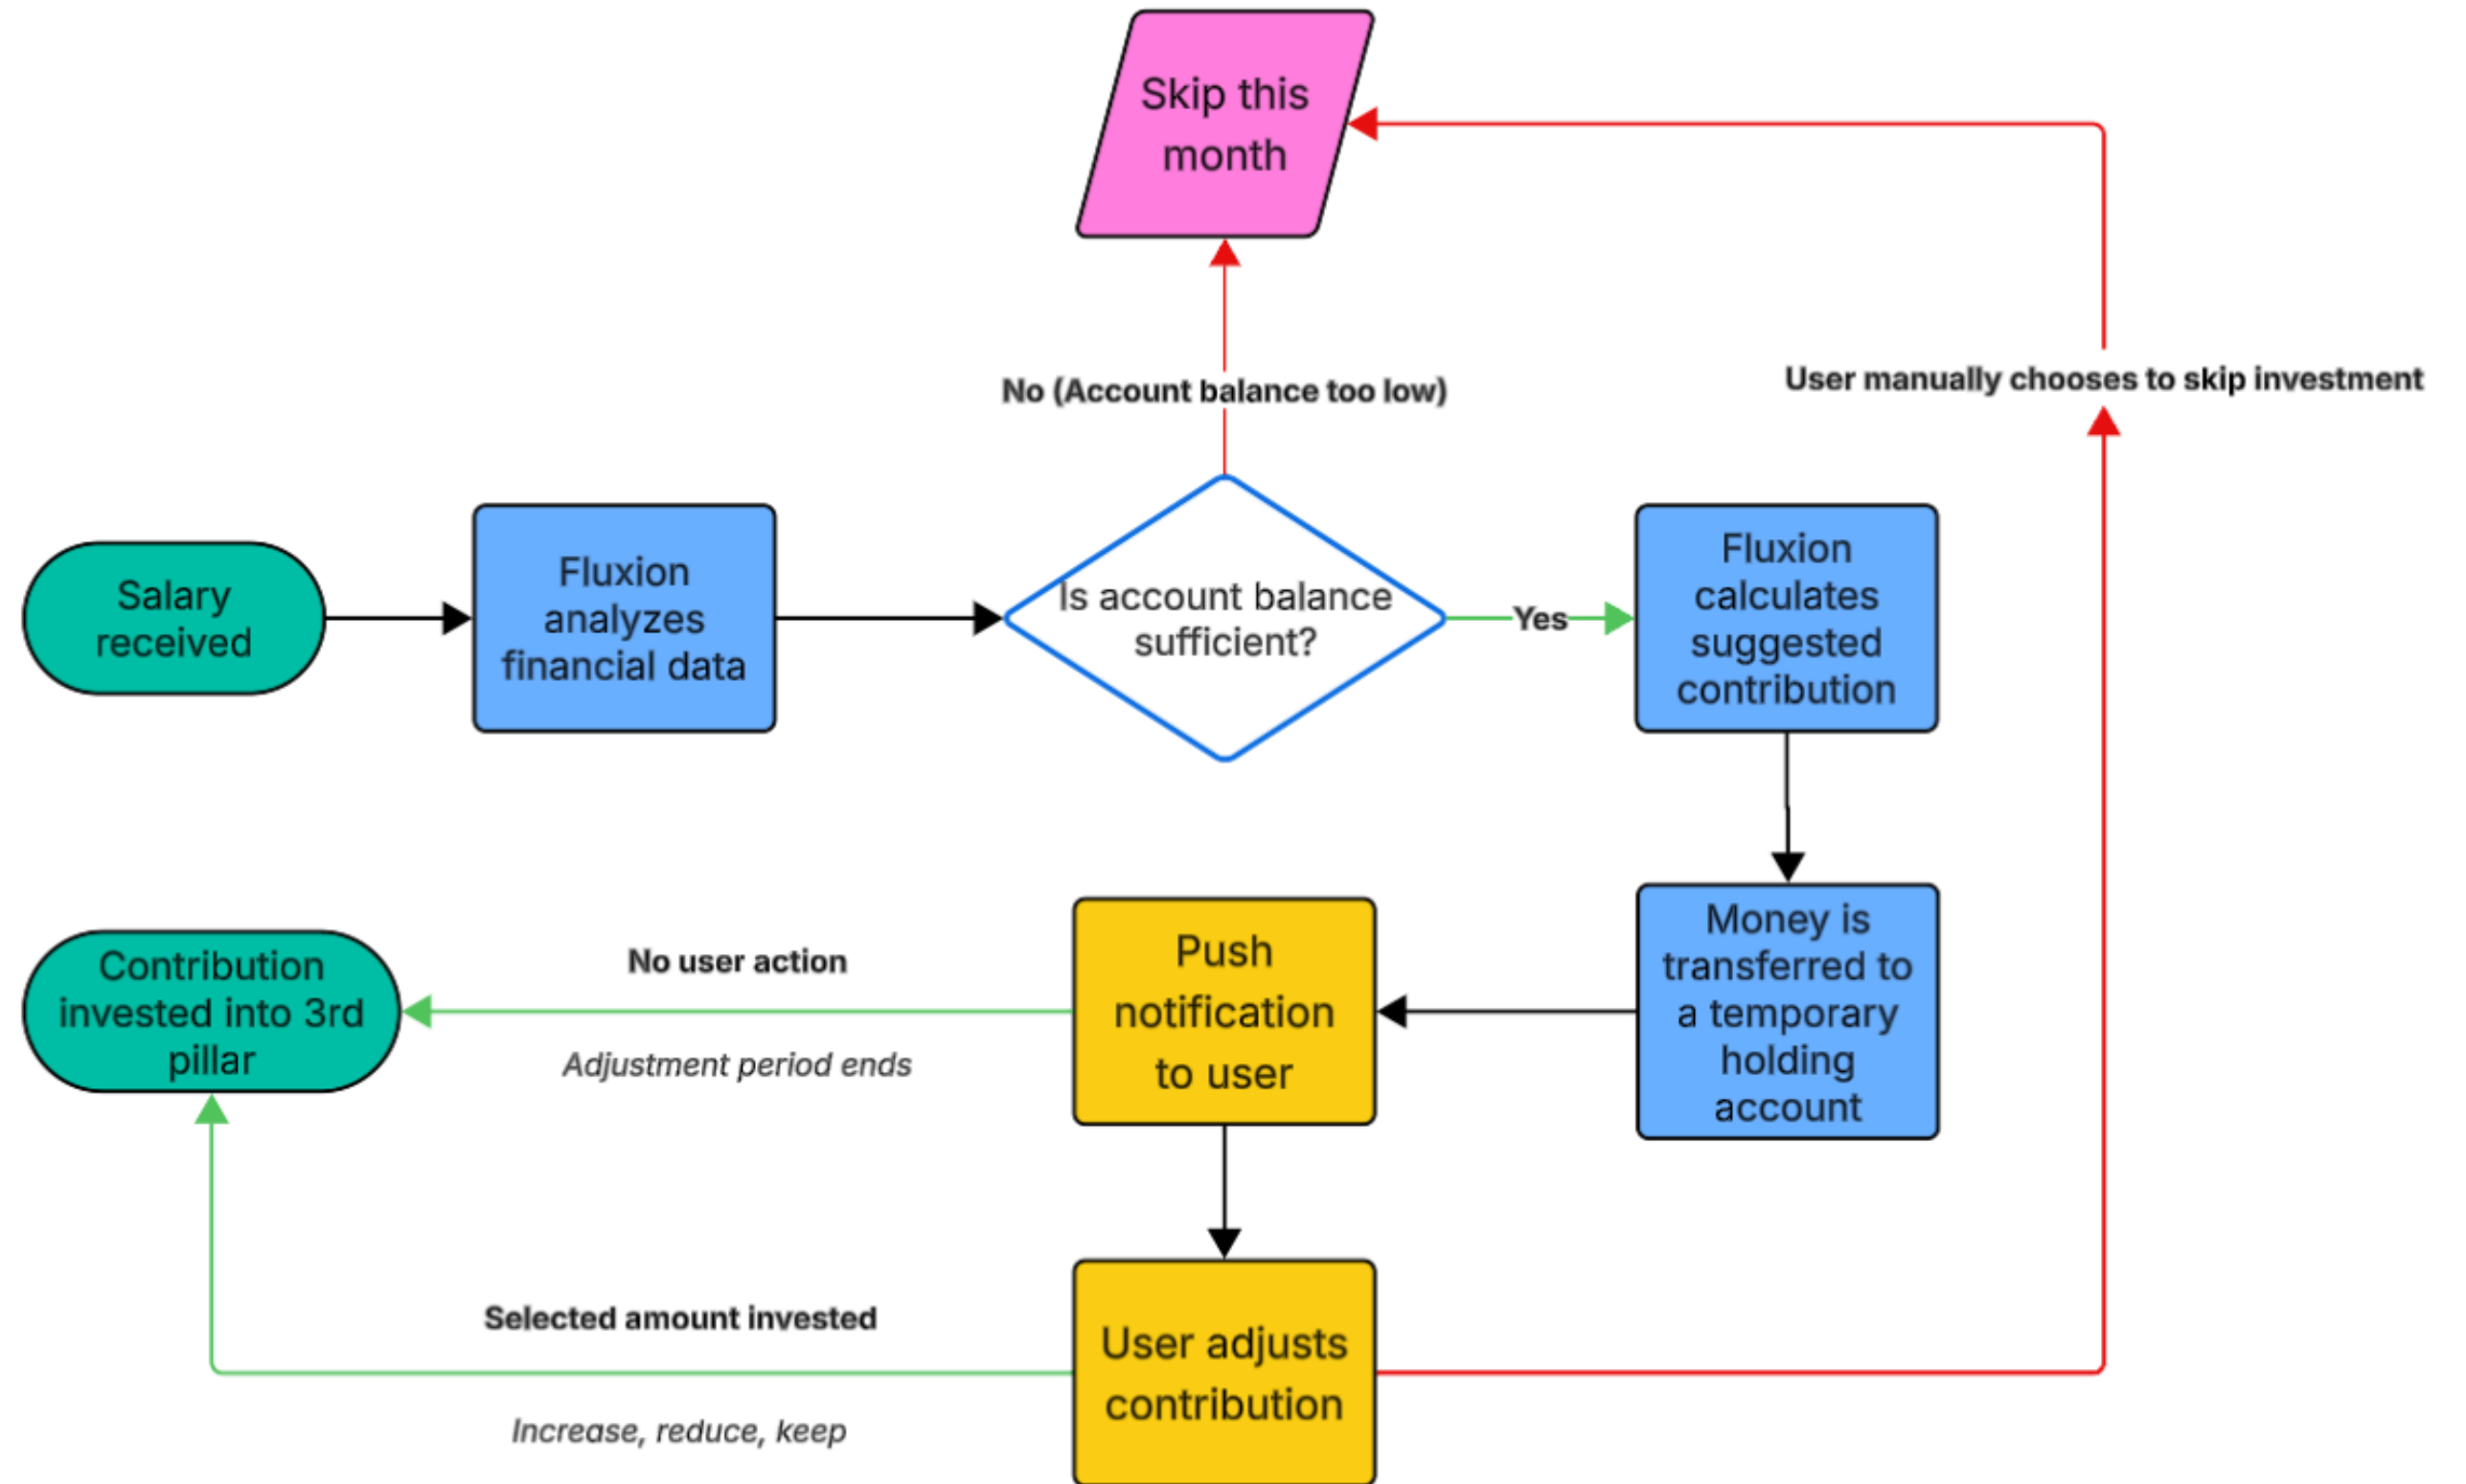

- They **do not adjust** to income
- They **ignore** changing monthly spending
- They create **pressure** in weaker months

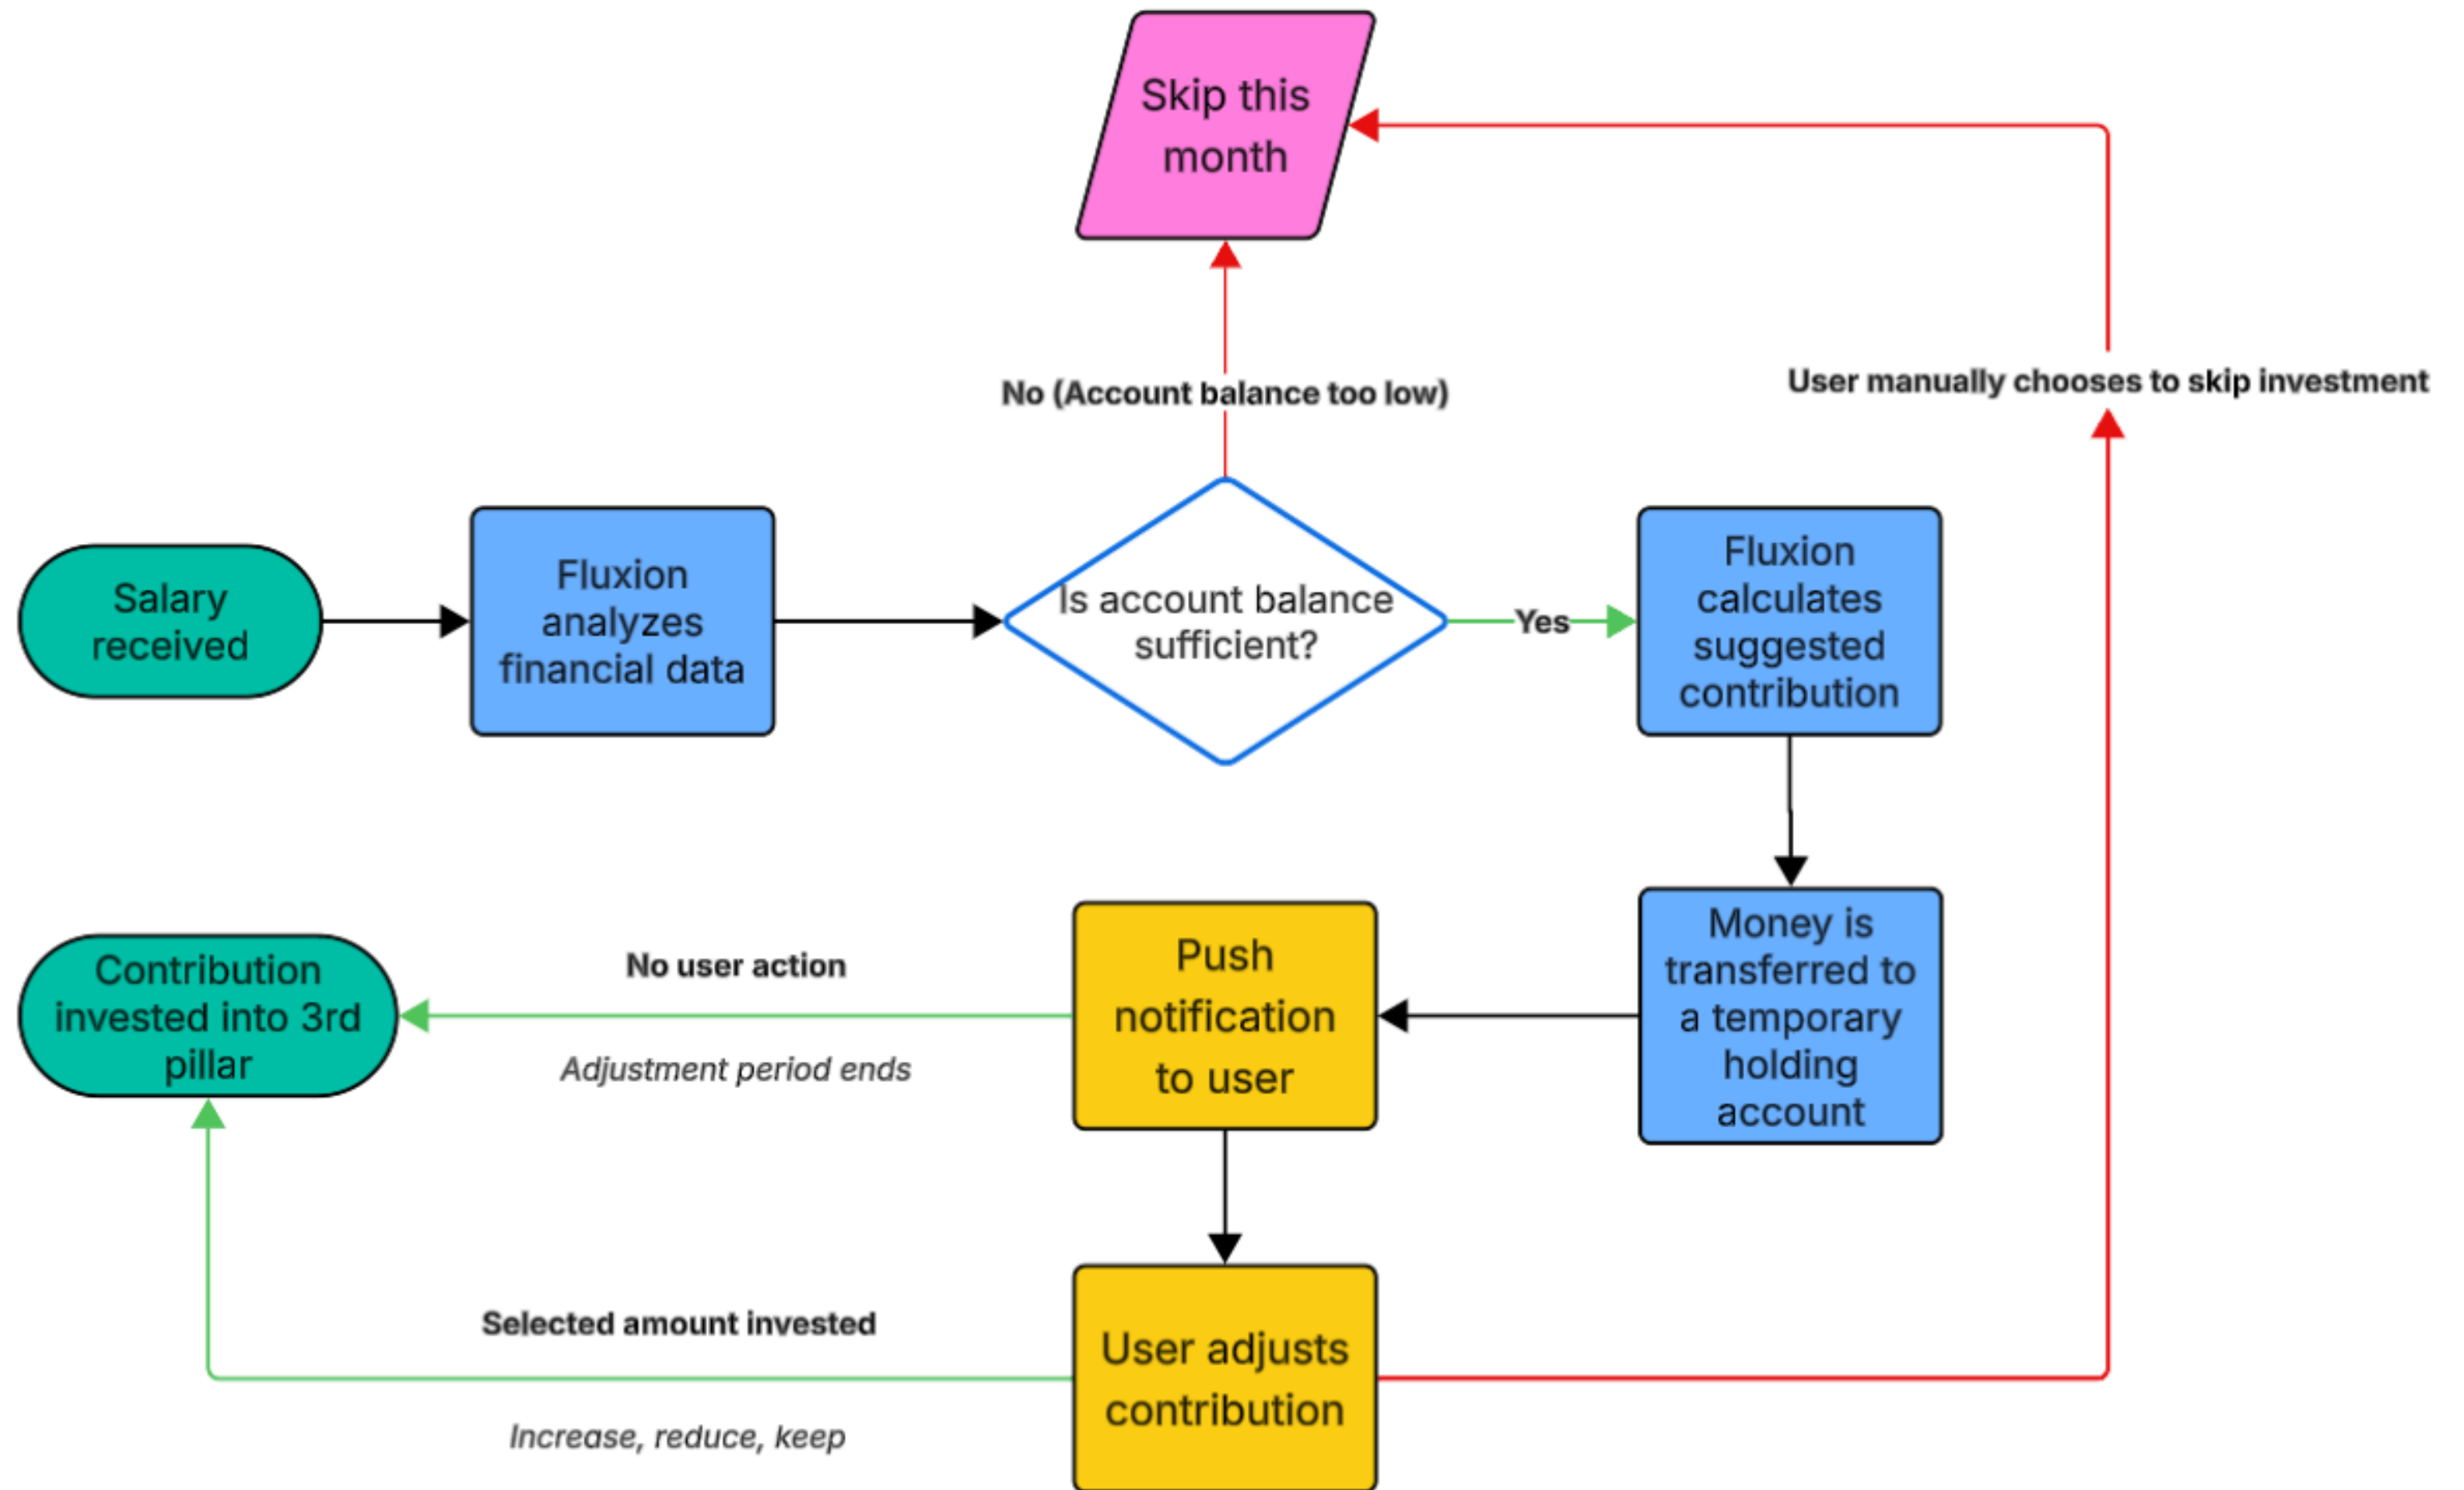

Dynamic investments

- On the user's **salary day**
- Offered via **push notification**
- Based on **salary**
- Based on previous month's **spending**
- Dynamic **floor and ceiling**

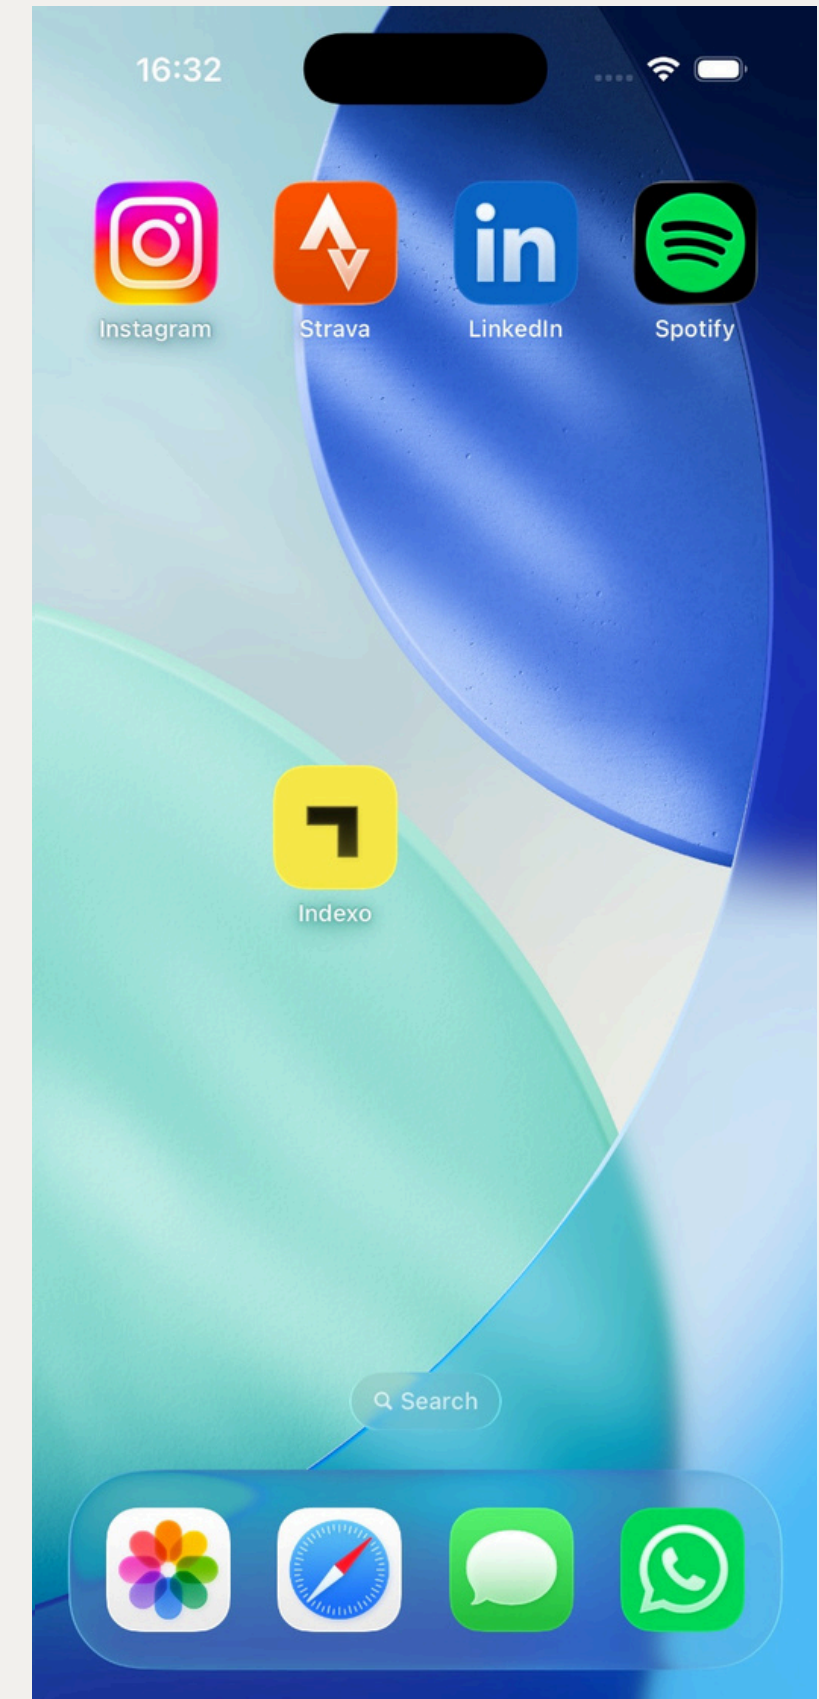

Solution

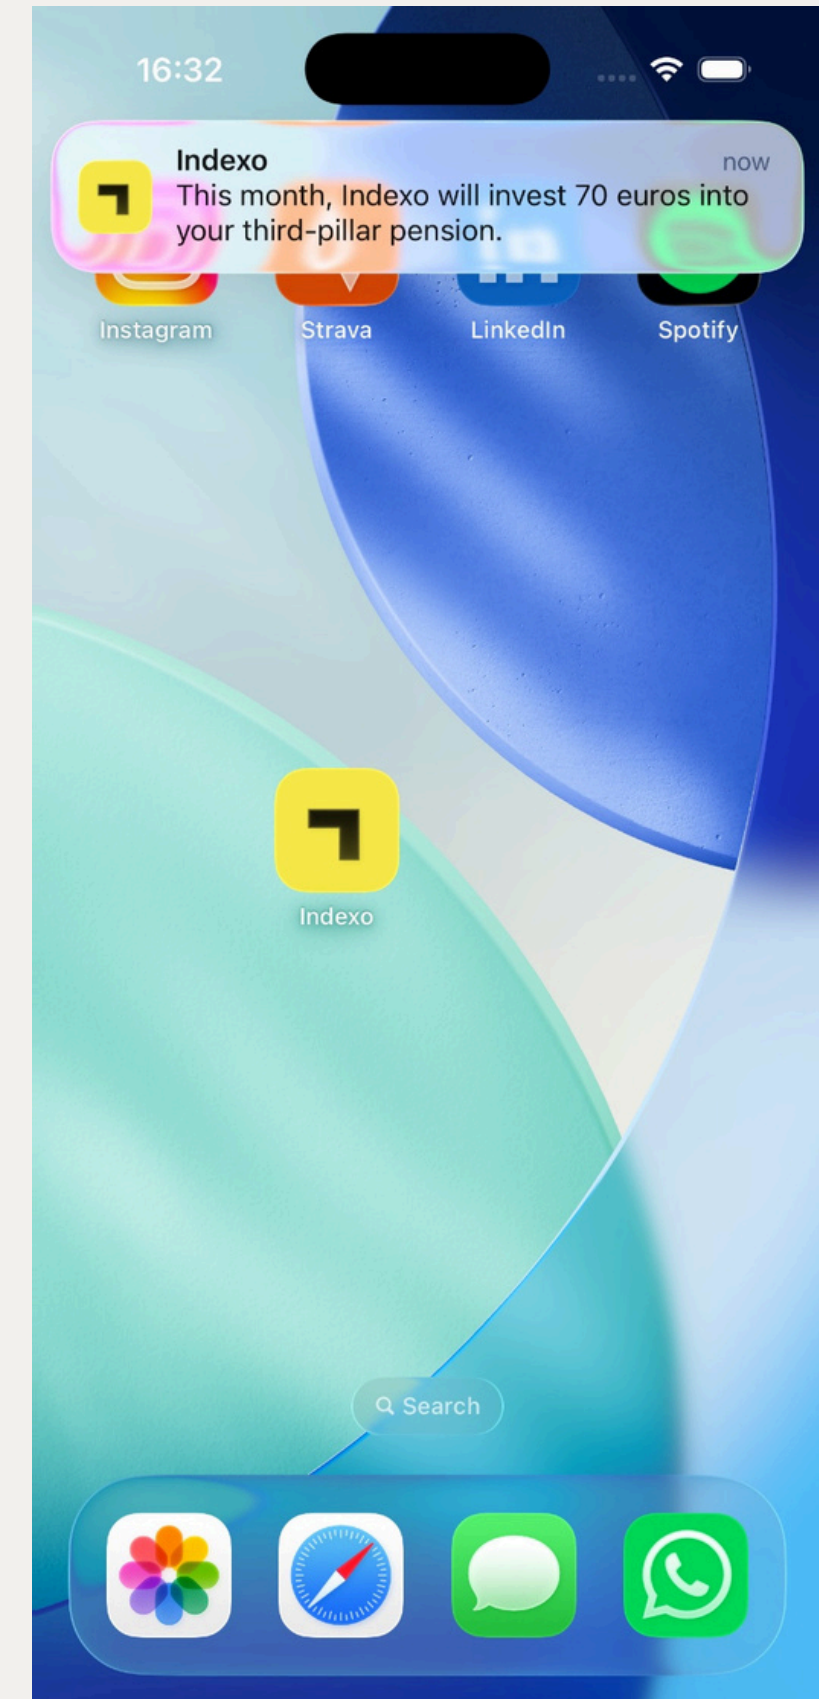

Feasibility

- Integrated within **banking app**
- Uses existing banking data
- Rule-based financial calculations
- Scalable across EU markets
- **Based on current platform capabilities**

Viability

460,000 users

312,000 active

148,000 inactive

**Information as of 2025-12, from the Bank of Latvia (Latvijas Banka).*

Viability

Inactive users

- **Better to skip than fully stop**
- Users stay in the system
- The app reminds users again later
- More users return to investing again

Viability

Active users

Case study from validation

- Started investing young
- Set contribution to **€20/month**
- Income grew over time
- Contribution amount never changed
- **User was too lazy to update it**

Viability

New users

- Users can **join** even **without current income**
- Contributions start only after salary is received
- Suitable for users with inconsistent or seasonal income
