

Fluxion

Third-pillar pension plans
that fit real life.

Fixed pension payments do not fit real income.

THE ISSUE

Fixed payments stay the same

- They do not adjust to income
- They ignore changing monthly spending
- They create pressure in weaker months

Fixed pension payments do not fit real income.

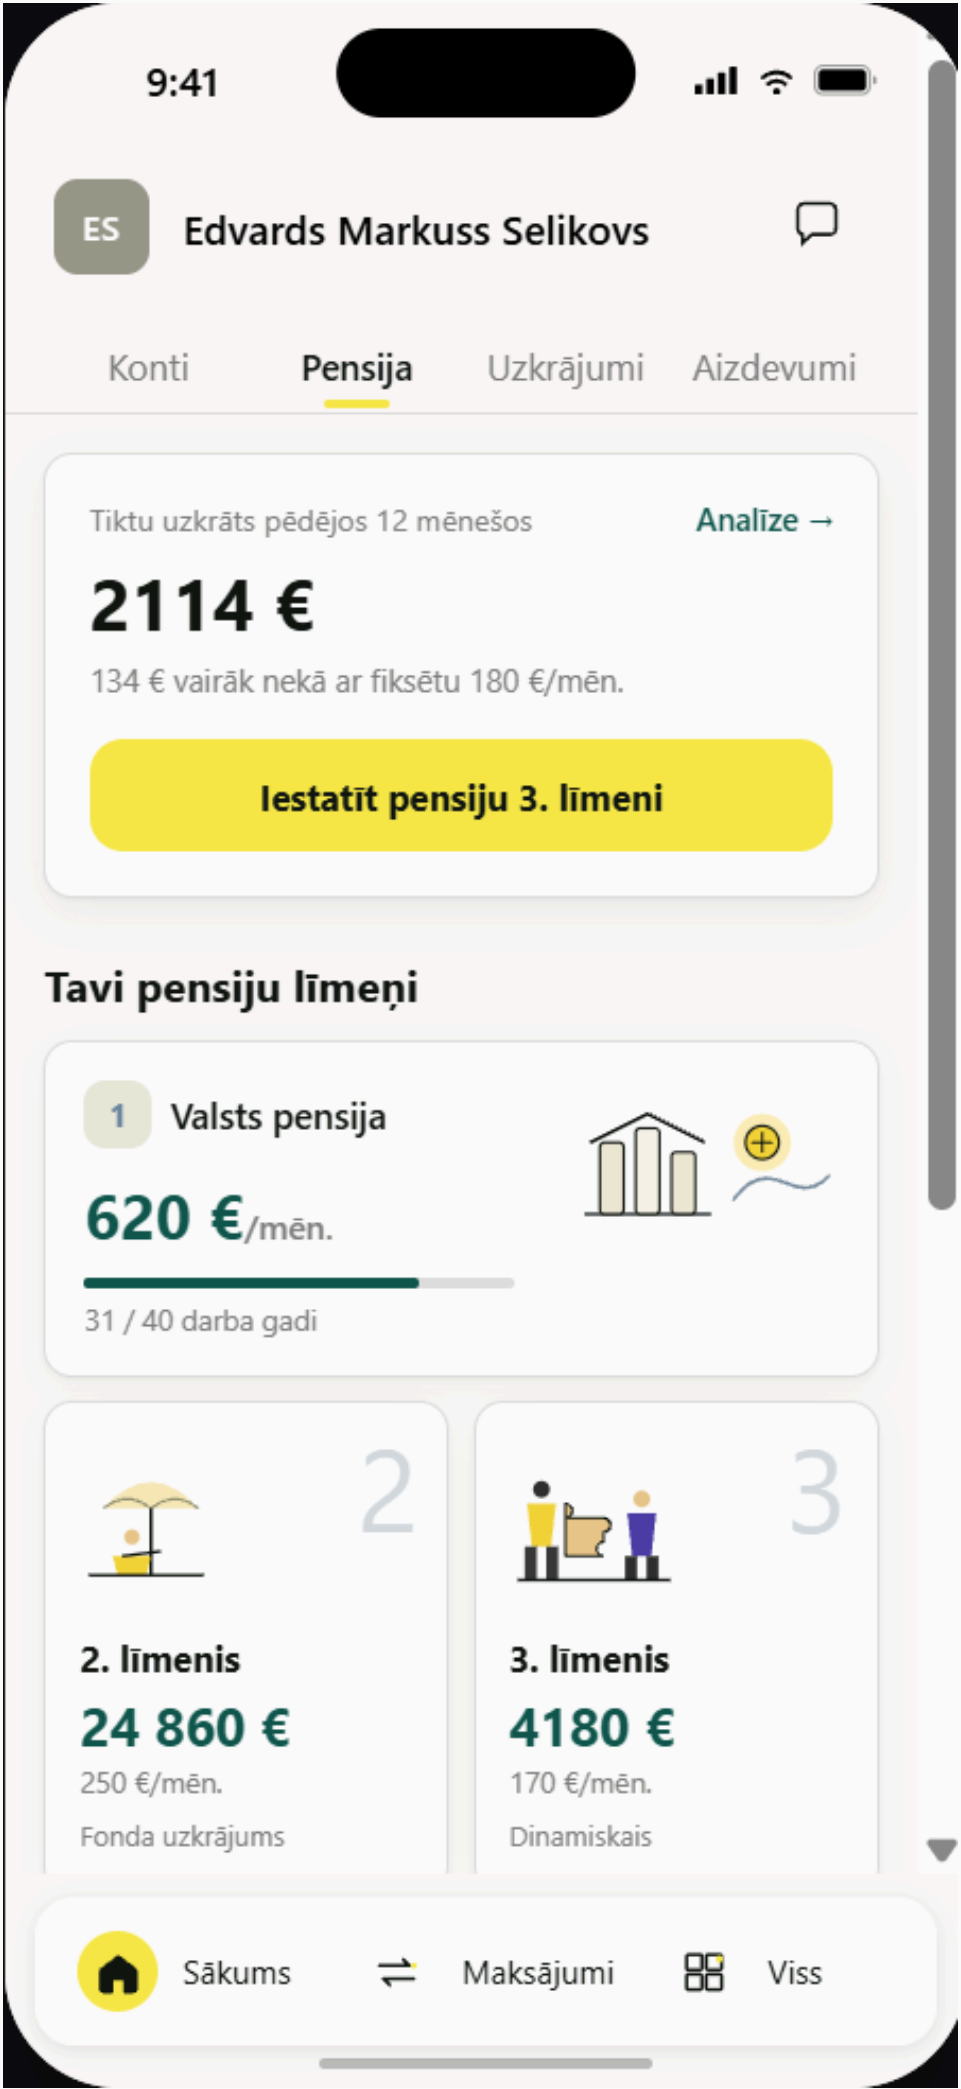

THE SOLUTION

Dynamic investments

- Paid on the user's **salary day**
- Based on **salary**
- Based on previous month's **spending**
- Dynamic **floor** and **ceiling**

Prototype

What? How? Where?

1

Within the banking app
of the user

2

Analytical section with
all 3 levels of pensions
combined giving the
clear image

3

4

Estimations based on
current investments
(Adjusted for inflation
and visualized with
real items)

Action from bank sides

Banks would participate by offering different investment plans that users can select, similar to second pension pillar systems

Users receive annual performance statements, creating transparency and encouraging banks to compete through better results

Plan Selection
